

INDUSTRY TALK: PROJECT MANAGEMENT

Group Member's :

1. Syarifah Dania binti Syed Abu Bakar (A23CS0183)
2. Ain Nurnabila binti Mohd Azhar (A23CS0207)
3. Damiya Aina binti Basir Abd Shammad (A23CS0220)

Background

- more to following the timeline and specific documentation
- more towards understanding the entire requirement itself
- most crucial skill: 2 ways communication (without it, we would not get the exact requirements)
- feedback is one of the important part in the project management
- On industrial, a lot of people have the (CYA) for specific objective to solve the mission
- documentation is also important to avoid misunderstanding between end-user and supplier

Waterfall methodology

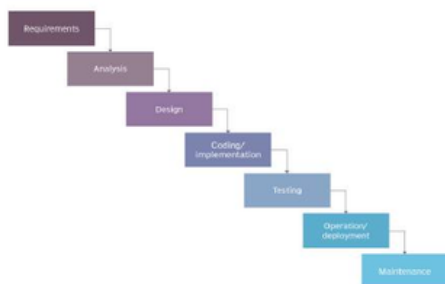

- to fulfil the order not to improve yet the product.
- Waterfall projects have a high degree of process definition with little or no output variability.

Agile methodology

- same as waterfall but different in term of looping
- take feedback, make an improvement until the objective of the project has been achieved.

Waterfall model

Real-life Communication in Development

1. Project microsoft
 2. click-up
- software project management tools
 - will be a lot of people
 - manageable

Github

- Mainly seen for developer but actually also for project management.

1. Backlog: list of things to do but do not sort it off yet.
2. Repeat the same feature to get the perfection.

REFLECTION

DANIA

FROM THE TALK I ATTENDED, I'VE COME TO APPRECIATE THE STRENGTHS AND LIMITATIONS OF ALL METHODS. WHILE WATERFALL PROVIDES STRUCTURE AND PREDICTABILITY, AGILE OFFERS FLEXIBILITY AND RESPONSIVENESS. AS A STUDENT, I RECOGNIZE THE IMPORTANCE OF SELECTING THE RIGHT APPROACH BASED ON THE UNIQUE REQUIREMENTS AND CONSTRAINTS OF EACH PROJECT. ULTIMATELY, BOTH WATERFALL AND AGILE METHODOLOGIES HAVE THEIR PLACE IN THE STUDENT'S TOOLKIT. WHETHER FOLLOWING A STRUCTURED PATH OR EMBRACING UNCERTAINTY, THE KEY IS TO REMAIN ADAPTABLE AND OPEN TO NEW WAYS OF WORKING. AS I CONTINUE TO GROW AND LEARN IN MY ACADEMIC JOURNEY, I'M GRATEFUL FOR THE OPPORTUNITY TO EXPLORE AND APPLY THESE VALUABLE PROJECT MANAGEMENT PRINCIPLES.

DAMIYA

I THINK BY JOINING THIS INDUSTRIAL TALK , I GOT TO KNOW HOW IMPORTANT IS THE PROJECT MANAGEMENT AS A COMPUTER SCIENCE STUDENT. THE INFORMATION ALONG WITH A LOT OF EXAMPLE GIVE ME BETTER EXPLANATION. BY THE EXPLANATION ABOUT THE WATERFALL METHODOLOGY AND AGILE APPROACH , I CAN FINALLY DIFFERENTIATE THEM. A LOT OF EXAMPLE WITH THE PICTURE GIVEN ALSO GIVE ME A REAL-LIFE EXPERIENCES . I HOPE TO FULLY EXPLORE M ORE ABOUT THE PROJECT MANAGEMENT AS IT IS VERY IMPORTANT IN INDUSTRY. THE SOFTSKILL THAT WERE TOLD A LOT W A S A COM M UNICATION SKILL SO I HOPE TO B E M O RE ACTIVE AND CONFIDENT TO SPEAK WITH A LOT OF PEOPLE.

BELLA

PROJECT MANAGEMENT, WHICH GIVES COMPLICATED ENDEAVORS STRUCTURE, DIRECTION, AND COHERENCE, IS THE FOUNDATION OF ANY SUCCESSFUL INITIATIVE. WHEN ONE CONSIDERS THE IMPORTANCE OF PROJECT MANAGEMENT, ONE REALIZES THAT IT INVOLVES MORE THAN JUST MARKING OFF TASKS ON A SCHEDULE; RATHER, IT REQUIRES CAREFUL RESOURCE ALLOCATION, COMMUNICATION, AND PROBLEM-SOLVING. IT INVOLVES ENCOURAGING COOPERATION BETWEEN HETEROGENEOUS GROUPS, MATCHING OBJECTIVES TO EXPECTATIONS OF STAKEHOLDERS, AND HANDLING UNCERTAINTY WITH RESILIENCY AND FLEXIBILITY. PROJECT MANAGEMENT ACTS AS A COMPASS FROM THE BEGINNING TO THE CONCLUSION, MAKING SURE THAT INITIATIVES STAY ON TRACK, PROVIDE VALUE, AND PRODUCE THE DESIRED RESULTS. HOWEVER, IT IS ALSO A DYNAMIC DISCIPLINE THAT IS ALWAYS ALTERING TO ADAPT TO NEW METHODS, TECHNOLOGIES, AND LANDSCAPES.
